

Vocabulary Bursting with Energy Contest

Instructions: This sheet contains four sets of physics terms that are related to the topic of energy. It is your team's job to complete the "Types of _____" label for each group of words and to eliminate the "imposter" word (or word that does not belong) in each group by crossing it out and replacing it with a word that fits in with the other words. Use the Visual Thesaurus to help your team figure out how to label each category of words and to eliminate and replace the imposter words. If your group completes this sheet accurately before the other teams in the class, you WIN!

<p>A. Types of :</p> <hr/> <p>1. chemical</p> <p>2. electrical</p> <p>3. central</p> <p>4. mechanical</p>	<p>B. Types of:</p> <hr/> <p>1. infrared</p> <p>2. ultrasonic</p> <p>3. ultraviolet</p> <p>4. microwave</p>
<p>C. Types of :</p> <hr/> <p>1. generator</p> <p>2. transformer</p> <p>3. inductor</p> <p>4. dissimulator</p>	<p>D. Types of :</p> <hr/> <p>1. adhesion</p> <p>2. fission</p> <p>3. fusion</p> <p>4. radioactive decay</p>
